

# **CATEYE Q3/Q3a MSC-CY200/300 Quick Start**

---

Click the button and follow the instructions.

Thank you for purchasing the CATEYE Q3 / Q3a Multi-Sport Computer.

This Quick Start Manual explains how to set up the wristwatch, how to install the unit to your bicycle, and how to wear the heart rate sensor.

Please set up the unit according to the specified procedure, then it will be ready for use as a Multi-Sport Computer.

- **Before use, read the instruction manual that comes with the product thoroughly to the end to understand the functions of this unit, and to use it safely in a correct manner.**
- **Pacemaker users should never use the heart rate sensor.**

This PDF contains a movie file.

When you click on the movie screen, a message regarding security appears. Click the “**Trust in the text**” or “**Play**” button to close the message.

Click the screen again to play the movie.

## Operation of buttons

Set up the wristwatch by operating the buttons as follows.  
Check the button position before you start setting up.

The **MENU** button, **SSS** button, **MODE1** button, and **MODE2** button are on the side of the wristwatch.

# CATEYE Q3/Q3a

Then, check by watching the movie on how to wear the heart rate sensor.

## Operation of buttons

The sea level altitude is corrected by operation of buttons as follows.  
Check the button position before you start setting up.

The **MENU** button, **SSS** button, **MODE1** button, and **MODE2** button are on the side of the wristwatch.

# CATEYE Q3/Q3a

## Quick Start Manual

### Sea level altitude correction

Selecting the correction  
method

Entering the sea level altitude

Applying the sea level  
altitude

This unit determines the altitude by converting the change in atmospheric pressure and temperature, therefore it may cause deviation from the actual sea level altitude depending on the ever-changing atmospheric pressure and temperature. It is recommended to correct the sea level altitude just before measurement.

1. Change to the Clock mode screen or the Sports mode screen to display the sea level altitude. In the Clock mode, press the **MODE1** button to display the sea level altitude at the top row display. In the Sports mode, press the **MODE1** button several times to display the sea level altitude at the top row display.
2. When you press and hold the **MODE1** button, the wristwatch changes to "Setting the sea level correction".

## Quick Start Manual

### Sea level altitude correction

Selecting the correction  
method

Entering the sea level altitude

Applying the sea level  
altitude

The following two methods can be used for the sea level altitude correction.

- **REF (Sea level altitude correction)**

Enter the altitude at the current point.

Enter the actual value at the point where the sea level altitude is known, such as the altitude along the seashore, or at a triangulation point sign, etc.

\* After selecting **REF**, pressing and simultaneously holding the **MODE1** button and the **SSS** button, or the **MODE2** button and the **SSS** button returns to the initial value (specified in ISO2533).

- **HOME (home altitude setting)**

Preset a specific sea level altitude.

Once you preset the sea level altitude of your home in advance, you can start with the correct sea level altitude by selecting **HOME** before starting from your home.

\* The sea level altitude of your home can be obtained using mapping software, such as Google Earth.

\*Google Earth is a trademark of Google Inc.

### Measure the tire circumference (L) of your bicycle

Adjust the tire pressure properly. With the rider's weight applied on the bicycle, roll the wheel one tire revolution with reference to a marker such as the valve, and measure the travel distance on the ground.
