

CATEYE ADVENTURE CC-AT200W Quick Start Click the button and follow the instructions.

Thank you for purchasing our cyclocomputer CATEYE ADVENTURE.

This Quick Start Manual explains how to set up the computer and how to install the unit on your bicycle.

Please set up the unit according to the specified procedure, then it will be ready for use as a cyclocomputer.

Before use, read the instruction manual that comes with the product thoroughly to the end to understand the functions of this unit, and to use it safely in a correct manner.

This PDF contains a movie file.

When you click on the movie screen, a message regarding security appears. Click the "Trust in the text" or "Play" button to close the message.

Click the screen again to play the movie.

Click the item you wish to view.

Operation of buttons

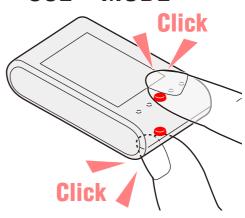

Set up the computer by operating the buttons as follows. Check the button position before you start setting up.

MODE

Press the **MODE** button on the back of the computer.

SSE + MODE

Press the **SSE** button on the face of the computer and the **MODE** button on the back simultaneously.

If the bracket and speed sensor are not installed to your bicycle, return to Contents, click the movies of how to install the bracket and speed sensor, and install them according to the instructions.

Operation of buttons

The sea level altitude is corrected by operation of buttons as follows.

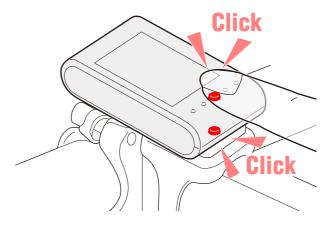

* "Sea level altitude correction" describes the case when the computer is installed on the bracket.

Operation of the MODE button

Press around the dots on the face of the computer, without touching the **SSE** button.

Operation of the SSE + MODE buttons

Press the **SSE** button along with the face of the computer.

Sea level altitude correction

Selecting the correction method

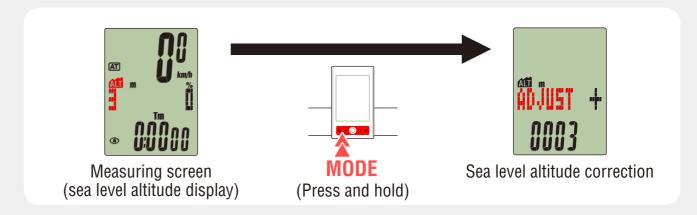

Entering the sea level altitude

Applying the sea level altitude

This unit determines the altitude by converting the change in atmospheric pressure and temperature, therefore it may cause deviation from the actual sea level altitude depending on the ever-changing atmospheric pressure and temperature. It is recommended to correct the sea level altitude just before measurement.

- 1. Press the **MODE** button to display the sea level altitude on the measuring screen.
- 2. When you press and hold the **MODE** button, the screen switches to "Setting" the sea level altitude correction".

Sea level altitude correction

Selecting the correction method

Entering the sea level altitude

Applying the sea level altitude

The following two methods can be used for the sea level altitude correction.

• ADJUST (Sea level altitude correction)

Enter the altitude at the current point.

Enter the actual value at the point where the sea level altitude is known, such as the altitude along the seashore, or at a triangulation point sign, etc.

HOME (Home altitude setting)

Preset a specific sea level altitude.

Once you preset the sea level altitude of your home in advance, you can start with the correct sea level altitude by selecting **HOME** before starting from your home.

- * The sea level altitude of your home can be obtained using mapping software, such as Google Earth.
- * Google Earth is a trademark of Google Inc.

Sea level altitude correction

Selecting the correction method (1/2)

Entering the sea level altitude

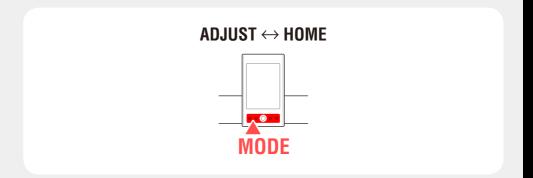

Applying the sea level altitude

Correction method

Selecting the correction method

When the **MODE** button is pressed, either "**ADJUST**" or "**HOME**" is selected. Select the correction method of your choice.

Sea level altitude correction

Selecting the correction method (2/2)

Entering the sea level altitude

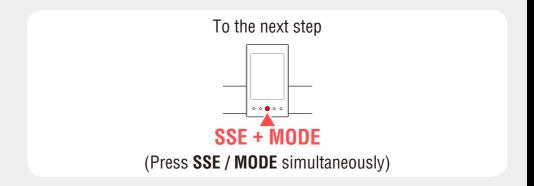

Applying the sea level altitude

Correction method

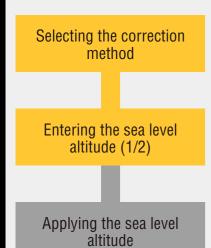

Selecting the correction method

After selecting, press the **SSE** button and the **MODE** button simultaneously to proceed to the next step "Entering the sea level altitude".

Sea level altitude correction

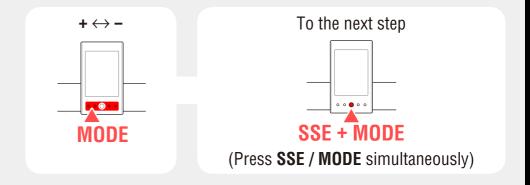

Selection of positive or negative symbol

Entering the sea level altitude

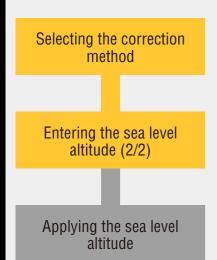

When the **MODE** button is pressed, "+" or "-" is selected. Select either the positive or negative symbol for the value you wish to set.

* Select "-" when the sea level altitude is below 0 m. After selecting, press the **SSE** button and the **MODE** button simultaneously to proceed to the next step "Entering the sea level altitude (2/2)".

Sea level altitude correction

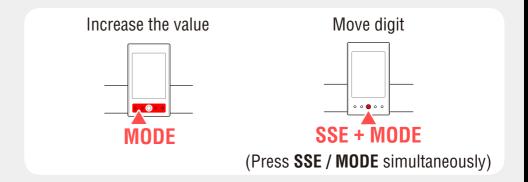

Sea level altitude

Entering the sea level altitude

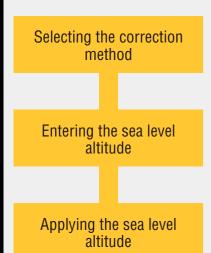

Enter the sea level altitude (a value with 4 digits) of the current point.

Pressing the **MODE** button increases the value flashing, and pressing the **SSE** button and the **MODE** button simultaneously moves to the next digit.

Sea level altitude correction

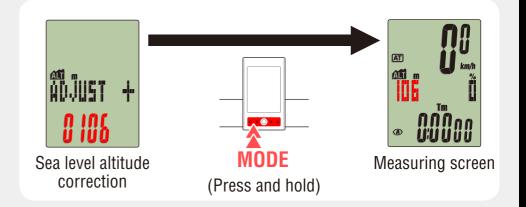

Sea level altitude correction

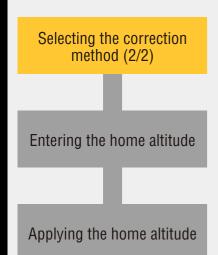

Applying the sea level altitude

Once the value you wish to set is displayed, press and hold the **MODE** button to return to the measuring screen. The altitude you set is applied to the sea level altitude on the measuring screen, and the sea level altitude correction is completed.

Sea level altitude correction

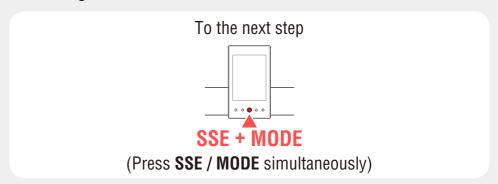

Correction method

Selecting the correction method

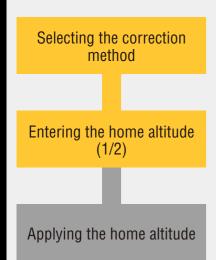

To set a new home altitude, press the **SSE** button and the **MODE** button simultaneously to proceed to the next step "Entering the home altitude".

When the home altitude has already been set, proceed to "Applying the home altitude".

Sea level altitude correction

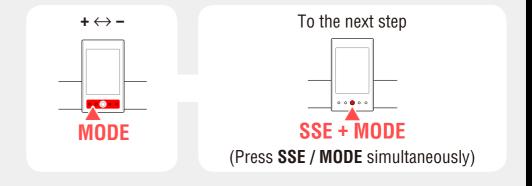

Selection of positive or negative symbol

Entering the home altitude

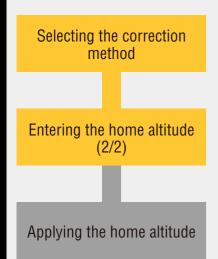

When the **MODE** button is pressed, "+" or "-" is selected. Select either the positive or negative symbol for the value you wish to set.

* Select "-" when the sea level altitude is below 0 m. After selecting, press the **SSE** button and the **MODE** button simultaneously to proceed to the next step "Entering the home altitude (2/2)".

Sea level altitude correction

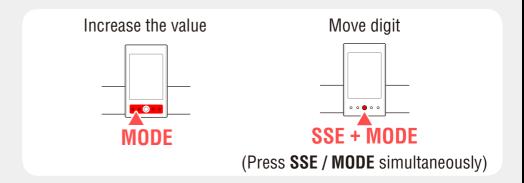

Home altitude

Entering the home altitude

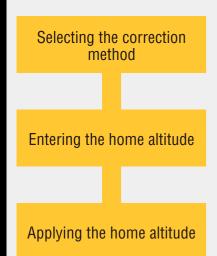

Enter the sea level altitude (a value with 4 digits) you wish to set as a home altitude, such as the altitude of your home.

Pressing the **MODE** button increases the value flashing, and pressing the **SSE** button and the **MODE** button simultaneously moves to the next digit.

Sea level altitude correction

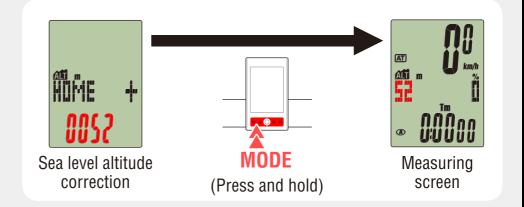

Home altitude

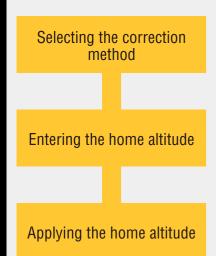

Applying the home altitude

Once the value you wish to set is displayed, press and hold the **MODE** button to return to the measuring screen. The altitude you set is applied to the home altitude on the measuring screen, and the sea level altitude correction is completed.

Sea level altitude correction

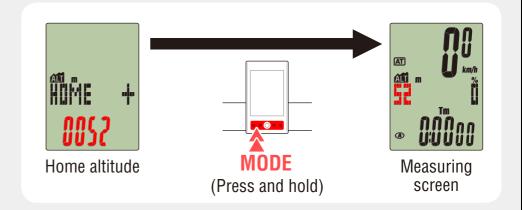

Home altitude

Applying the home altitude

Press and hold of the **MODE** button to return to the measuring screen.

The altitude you set is applied to the home altitude on the measuring screen, and the sea level altitude correction is completed.

How to install the bracket

[FlexTight™]

Click the screen to play.

How to install the speed sensor

[Digital speed sensor]

Click the screen to play.

Setting up the computer

Measure the tire circumference (L) of your bicycle

Adjust the tire pressure properly. With the rider's weight applied on the bicycle, roll the wheel one tire revolution with reference to a marker such as the valve, and measure the travel distance on the ground.
