Quick Start Manual

Start measurement

Important:
Measurements cannot be made in locations where a GPS signal cannot be received.

❶ Turn on the power by pressing and holding the ⏻ button. The GPS search screen is displayed. When a GPS signal is received or when the **MODE** button is pressed, the STEALTH evo switches to the measurement screen.

❷ Check that 📡 is displayed on the measurement screen, and press the ⏻ button. **STOP** changes to **GO**, and measurement starts. During measurement, measurement starts and stops automatically in sync with the movement of the bicycle.

❸ If the ⏻ button is pressed during measurement, **STOP** is displayed on the screen and measurement is paused. * To resume measurement press the button again.

Stop measurement

1 To stop measurement, reset measurement data by pressing and holding **MODE**.
All data measured up to the current point in time is created as trip data.

* For information about uploading trip data, return to the Contents page and watch the movie about uploading trips.

2 Turn off the power by pressing and holding the ⏻ button for 2 seconds.

What is CATEYE Sync™

CATEYE Sync™ is PC software that acts as an interfaces between the STEALTH evo, your PC, and the website. It can be used to:

- download ride data recorded with the STEALTH evo to PC and upload it to a website, and
- configure the STEALTH evo from a PC.

What is CATEYE Atlas™

CATEYE Atlas™ is a website where you can view trips recorded with a STEALTH evo or INOU.

- The trip (measurement data) loaded using CATEYE Sync™ can be viewed on a map and a graph.
- By storing trips, you can use CATEYE Atlas™ as a database of your cycling life.
- You can share your trips with your friends or the public.

* The screen and the functions for CATEYE Sync™ and CATEYE Atlas™ are subject to change.
