

# CATEYE STEALTH 50

## CC-GL50

### Quick Start

#### PDF file

- Opening a file may display a message related to the format field on the screen. Click on the icon in the message to close.
- When you click on the movie screen, a message regarding security appears. Click the **“Trust in the text”** or **“Play”** button to close the message. Click the screen again to play the movie.

---

Click the button and follow the instructions.

Thank you for purchasing our cyclocomputer CATEYE STEALTH 50.

This Quick Start Manual explains how to set up the computer and how to install the unit on your bicycle.

Please set up the unit according to the specified procedure, then it will be ready for use as a cyclocomputer.

**Before use, read the instruction manual that comes with the product thoroughly to the end to understand the functions of this unit, and to use it safely in a correct manner.**

### I have an ANT+ sensor

This unit has 2 different methods for pairing.

#### **Automatic search:**

The computer completes pairing by receiving the signal sent from the ANT+ sensor. Generally, use this method for pairing.

#### **Manual ID number entry:**

When the sensor ID number is known, you can perform pairing by entering the number. Use this method for pairing, when there are two or more ANT+ sensors, such as at a race site, and automatic search cannot be done.

### Measure the tire circumference (L) of your bicycle

Adjust the tire pressure properly. With the rider's weight applied on the bicycle, roll the wheel one tire revolution with reference to a marker such as the valve, and measure the travel distance on the ground.

\* Enter the tire circumference of the wheel to which the sensor magnet is attached (front or rear).

### Measure the tire circumference (L) of your bicycle

Adjust the tire pressure properly. With the rider's weight applied on the bicycle, roll the wheel one tire revolution with reference to a marker such as the valve, and measure the travel distance on the ground.

\* Enter the tire circumference of the wheel to which the sensor magnet is attached (front or rear).

## **What is CATEYE Sync™**

CATEYE Sync™ is a software application for PC, which mediates between this unit, your PC and the website.

- The trip data recorded with this unit can be loaded into your PC, and be uploaded to the website.
- The settings of this unit can be changed using your PC.

## **What is CATEYE Atlas™**

CATEYE Atlas™ is a website where you can view the trips measured using this unit or INOU.

- The trip (measurement data) loaded using CATEYE Sync™ can be viewed on a map and a graph.
- By storing trips, you can use CATEYE Atlas™ as a database of your cycling life.
- You can disclose your trips to your friends or the public.
