Before using the computer, please thoroughly read this manual and keep it for future reference.

Please visit our website, where detailed instructions with movies are available and the instruction manual can be downloaded.

⚠️ Warning / Caution

- Do not concentrate on the computer while riding. Ride safely!
- Install the magnet, sensor, and bracket securely. Check these periodically.
- If a child swallows a battery, consult a doctor immediately.
- Do not leave the computer in direct sunlight for a long period of time.
- Do not disassemble the computer.
- Do not drop the computer to avoid malfunction or damage.
- When you press the MODE button with the computer installed to the bracket, press around the dot section on the surface of the computer. Pressing strongly the other section may result in malfunction or damage.
- When cleaning the computer, bracket and sensor, do not use thinners, benzene, or alcohol.
- Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to local regulations.
- LCD screen may be distorted when viewed through polarized sunglasses lenses.

Wireless Sensor

The sensor was designed to receive signals within a maximum range of 60 cm, to reduce chance of interference.

When adjusting the wireless sensor, note the following:

- Signals cannot be received if the distance between the sensor and the computer is too large.
- The receiving distance may be shortened due to low temperature and exhausted batteries.
- Signals can be received only when the back of the computer is facing the sensor.

Interference may occur, resulting in incorrect data, if the computer is:

- Near a TV, PC, radio, motor, or in a car or train.
- Close to a railroad crossing, railway tracks, TV stations and/or radar base.
- Using with other wireless devices, or some particular battery lights.

Frequency Band : 19 kHz     Radiated Power : −31.7 dBm

Hereby, CATEYE Co., Ltd. declares that the radio equipment type CC-RD310W is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address : cateye.com/doc

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:(1)This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Modifications

The FCC requires the user to be notified that any changes or modifications made to this device that are not expressly approved by CatEye Co., Ltd. May void the user ‘s authority to operate the equipment.

Canada 310

This device complies with Industry Canada’s RSS-310. Operation is subject to the condition that this device must not cause harmful interference and must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme au CNR-310 d’Industrie Canada. Son exploitation est autorisée à condition que l’appareil ne produise pas de brouillage préjudiciable et qu’il accepte tout brouillage, même celui susceptible d’en compromettre le fonctionnement.

CAN ICES-3 (B) / NMB-3 (B)
Perform the All Clear operation, when you use the unit for the first time or restore the unit to the condition checked at the factory.

1 Clear all data (initialization)
Press the AC button on the back of the computer.

2 Select the speed units
Select “km/h” or “mph”.

3 Enter the tire circumference
Enter the front wheel tire circumference of your bicycle in mm.
* Refer to the “Tire circumference reference table” as a guide.

4 Set the clock
Pressing and holding the MODE button switches the display to “Displayed time”, “Hour”, and “Minute” in order.

Tire circumference
There are the following ways to determine the tire circumference.

* Measure the tire circumference (L)
  Measure the distance when the tire turns right round with your weight applied, while adjusting the tire pressure appropriately.

**Refer to the tire circumference reference table**
* Generally, the tire size or ETRTO is indicated on the side of the tire.

</tbody>
</table>

- • Measure the tire circumference (L)
  Measure the distance when the tire turns right round with your weight applied, while adjusting the tire pressure appropriately.

- • Refer to the tire circumference reference table
  * Generally, the tire size or ETRTO is indicated on the side of the tire.
How to install the unit on your bicycle

Refer to the Quick Start Manual, where you can learn how to install the unit in detail using a movie.

Attach the bracket to the stem or handlebar

1-1 When mounting the bracket to the stem

- Bracket
- Bracket rubber pad
- Rubber band
- Nylon tie

* Use a nylon tie together to fix it firmly.

1-2 When mounting the bracket to the handlebar

- Bracket
- Nylon tie
- Rubber band
- Bracket rubber pad
- (SPD-01)

(x 4)

Bracket
How to install the unit on your bicycle

1. Adjust the sensor magnet so that the conditions of A, B, C are satisfied, and then check the operation by turning the front wheel slowly.

Positioning and testing

2. Install the sensor and magnet

- The distance from the computer to the sensor is within the transmission data length, and the back of the computer faces downward.
- The magnet passes through the sensor zone of the speed sensor.
- The clearance between the sensor surface and the magnet is within 5 mm.

3. Remove/Install the computer

- While supporting it by hand, pull securely.
- Push it out as if lifting the front up

* The wheel magnet may be installed anywhere on the spoke if the installation conditions are satisfied.
Operating the computer [Measuring screen]

Pressing the MODE button switches the selected data at the bottom in the order shown in the following figure.

- **Tm Elapsed Time**: 0:00’00” – 9:59’59”
- **Dst Trip Distance**: 0.00 – 999.99 km [mile]
- **Dst2 Trip Distance-2**: 0.00 – 999.99 / 1000.0 - 9999.9 km [mile]
- **Odo Total Distance**: 0.0 – 9999.9 / 10000 - 99999 km [mile]
- **Mx Maximum Speed**: 0.0(4.0) – 105.9 km/h [0.0(3.0) – 65.0 mph]
- **Av Average Speed**: 0.0 – 105.9 km/h [0.0 – 65.0 mph]

When the computer is mounted on the bracket, once you press the dot section on the unit, the MODE button is pressed.

* The average speed displays .E instead of the measurement value, when Tm exceeds about 27 hours or Dst exceeds 999.99 km. Reset the data.

To “Changing the computer settings [Menu screen]” (page 7)
Operating the computer [Measuring screen]

Starting / Stopping measurement
The unit automatically measures according to the movement of your bicycle.
The speed unit (km/h or mph) flashes during measurement.

Resetting data
With the data other than Dst2 displayed, pressing and holding the MODE button returns the measurement data to 0.
With Dst2 displayed, pressing and holding the MODE button returns only Dst2 to 0.
The total distance (Odo) cannot be reset.

Power-saving function
If the computer has not received a signal for 10 minutes, power-saving screen will activate and only the clock will be displayed.
When you press MODE, or the computer receives a sensor signal, the measuring screen reappears.

If another 60 minutes of inactivity elapses in the power-saving screen, only the speed unit is displayed on the screen.
With such a screen, pressing the MODE button returns to the measurement screen.
Changing the computer settings [Menu screen]

Pressing MENU on the measurement screen changes to the menu screen. Various settings can be changed on the menu screen.

Changing the settings

With a menu you want to change displayed, once you press and hold the MODE button, you can change various settings by the button operation as described.

Overview of the menu screen

- Switching the circumference A/B
  The tire to be used (A/B) can be selected.

- Setting the tire circumference
  Set the tire circumference.

- Setting the clock
  Change the clock.

* After changing, be sure to register the setting(s) by pressing the MENU button.
* Leaving the menu screen without any operation for 1 minutes returns to the measurement screen, and changes are not saved.

Maintenance
To clean the computer or accessories, use diluted neutral detergent on a soft cloth, and wipe it off with a dry cloth.

Replacing the battery

Computer
When the display becomes dim, replace the battery. Install a new lithium battery (CR1616) with the (+) side faced upward.

* Press the top edge of waterproof inner cap to remove it.
* After replacing the computer battery, follow the procedure described in “Preparing the computer”
* Noting the total distance before replacing the battery allows you to start from the total distance you enter manually after replacing it.

Speed sensor
When the speed is not displayed even after adjusting correctly, replace the battery. Insert new lithium batteries (CR2032) with the (+) sign upward, and close the battery cover firmly.

* After replacement, check the positions of the sensor and magnet.

Troubleshooting

The sensor signal icon does not flash.
(the speed is not displayed)

Check that the clearance between the sensor and magnet is not too large. (Clearance: within 5 mm)
Check that the magnet passes through the sensor zone correctly.

Adjust the positions of the magnet and sensor.

Is the computer installed at the correct angle?
Back of computer must face toward the sensor.

Check that the distance between the computer and sensor is correct. (Distance: within 20 to 60 cm)
Install the sensor within the specified range.

Is the computer or sensor battery weak?
* In winter, battery performance diminishes.
If the computer reacts only when it is close to the sensor, weak batteries may cause it.
Replace with new batteries according to the procedure specified in the section “Replacing the battery”.

Nothing is displayed by pressing the button.
Replace the computer battery according to the procedure specified in the section “Replacing the battery”.

Incorrect data appear.
Clear all according to the procedure described in “Preparing the computer”.
All measured data are deleted.

**Limited warranty**

**2-Years Computer/Sensor only**
(**Accessories and Battery Consumption excluded**)

CatEye cycle computers are warranted to be free of defects from materials and workmanship for a period of two years from original purchase. If the product fails to work due to normal use, CatEye will repair or replace the defect at no charge. Service must be performed by CatEye or an authorized retailer. To return the product, pack it carefully and enclose the warranty certificate (proof of purchase) with instruction for repair. Please write or type your name and address clearly on the warranty certificate. Insurance, handling and transportation charges to CatEye shall be borne by person desiring service. For UK and REPUBLIC OF IRELAND consumers, please return to the place of purchase. This does not affect your statutory rights.
