ENG

1 BEFORE INITIAL USE / HOW TO CHARGE

Indicator

Standard charging time **Approx. 3.5 h**
USB 2.0 (500 mAh)

Before Initial Use

Be sure to charge it before use, according to the instructions "HOW TO CHARGE" and "Cautions on recharging".

⚠ WARNING!!!

- Before your trip, make sure the light is securely attached and lights up. Do not use a damaged rubber band.
- Always pay attention to the remaining battery power by checking the indicator periodically while using the light.

⚠ CAUTION!

- Stop your bicycle to operate the switch.
- Keep the light away from children.
- Make sure the light is securely attached to the band. Failure to do so may decrease the light's resistance to rain or cause the light to fall off during use.
- This product is water-resistant under normal daily use and can be used in the rain. However, do not intentionally submerge it in water.

⚠ LITHIUM-ION BATTERIES

When charging for the first time or after a prolonged period of disuse

The voltage of the rechargeable battery may drop during a long period of storage due to self-discharge. Charge the battery prior to use.

Cautions on recharging

- Avoid charging in direct sunlight or in a vehicle parked under direct sunlight, and make sure to charge only when the ambient temperature is between 41°F and 104 °F (5 and 40°C).
- Before charging, be sure that no dust or other foreign objects are attached to the USB plug.
- Do not subject the light to vibrations while charging.
- Once charging is complete, be sure to disconnect the USB plug.

Cautions in use

- Charging, discharging, and storing in high temperatures will cause the rechargeable battery to deteriorate faster. Do not place the light inside a vehicle or near a heater.
- If the illumination time is significantly reduced even after proper charging, the rechargeable battery may be nearing the end of its service life. Dispose of the used rechargeable battery according to local regulations.

Cautions on storage

Cool and dry storage is recommended. For long period storage, it is important to charge the battery 30 minutes every 6 months.

Cautions for disposal

When disposing of the light unit, dispose of it according to local regulations.

2 HOW TO MOUNT

Attach securely in the mounting position.

3 SWITCH OPERATION

SPARE/OPTIONAL PARTS

- 5442811**
Rubber band and hook (SL-LD160-F)
- 5442810**
Rubber band and hook (SL-LD160-R)
- 5342730**
USB cable (MICRO USB)

SPECIFICATIONS

Battery	Lithium-ion polymer battery 3.7 V - 70 mAh
Charge	Micro USB plug
Operating time	SL-LD160RC-F / SL-LD160RC-R
• Constant :	Approx. 2.5 h / 1.5 h
• Rapid flashing :	Approx. 5.5 h / 3.5 h
• Slow flashing :	Approx. 6 h / 4 h
	* Average runtime at 20°C.
Standard charging time	Approx. 3.5 hours * USB 2.0 (500 mAh)
Temperature range	Charging : 41°F - 104°F (5°C - 40°C) Operating : 14°F - 104°F (-10°C - 40°C)
Recharge/discharge number of times	About 300 times (until the rated capacity drops to 70%) (until the rated capacity drops to 70%)
Dimensions/weight	01-1/16" x 1-1/16" (027 x 27 mm) / 0.9 oz (25 g)

* The specifications and design are subject to change without notice.

LIMITED WARRANTY

2-year Warranty: Light unit only (excludes battery deterioration)

CatEye products are warranted to be free of defects from materials and workmanship for a period of 2 years from original purchase. If the product fails to work during normal use, CatEye will repair or replace the defect at no charge. Service must be performed by CatEye or an authorized retailer. To return the product, pack it carefully and enclose the warranty certificate (proof of purchase) with instruction for repair. Please write or type your name and address clearly on the warranty certificate. Insurance, handling and transportation charges to CatEye shall be borne by person desiring service. For UK and REPUBLIC OF IRELAND consumers, please return to the place of purchase. This does not affect your statutory rights.
