

Light unit

AAA alkaline batteries

FlexTight[™] bracket (SP-11)

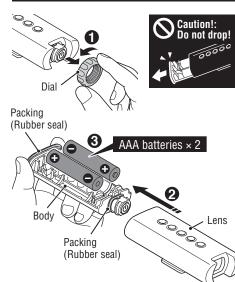

⚠ WARNING!!!

To prevent accidents and to ensure safe riding, make sure the light is securely attached to the bracket and it is functioning properly before the ride.

ACAUTION!

- This light detects deceleration through the use of acceleration sensor. Please note that activation of the Kinetic function depends on the degree of deceleration, the light may not react or the reaction may be delayed.
- Stop your bicycle to operate the switch.
- This device is rated IPX7 based on JIS C0920. Do not use the product while immersed in water. Doing so may cause a malfunction. Wipe off any moisture after use.
- If the light unit or parts become dirty with mud, etc., clean with a soft cloth which is moistened with mild soap. Never apply paint thinner, benzine or alcohol; damage will result.

1 HOW TO INSTALL BATTERY

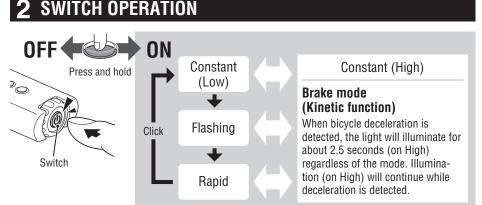

1. Rotate the dial and pull out the body from the lens as shown. **1 2**

- * Be sure to securely hold the unit while operating. If dropped accidentally, unexpected damage may occur.
- 2. Insert the batteries according to the orientation marked on the body. (3)
- 3. Reattach the lens in the reverse order.

CAUTION!

- Do not use in combination with new and old batteries, or different types of batteries.
- Be sure to install batteries in the correct direction.
- To ensure waterproof performance, align the packing (rubber seal) with the groove on the body and securely attach the lens, then tighten the dial so that it is not loose.
- Remove and store batteries when you will not use the light for a long period of time. Otherwise, batteries may leak liquid, which may result in failure.

* When turning the light on, it lights up in the mode that was used last time. (Mode memory function)

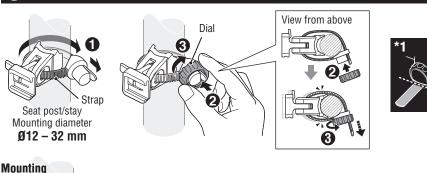

3 HOW TO MOUNT

Click

Removing

6

Press and hold

5 1. Mount the bracket on the seat post or the seat stay as shown. 1 to 3 2. Install the light unit on the bracket until a click is heard (4), then loosen the dial and adjust the lighting angle so that the light unit is perpendic-90 ular to the ground. 5 000 3.
